## Make Value Test

# Unit test

## OpenDialogue Box test

The screenshot shows the Eclipse IDE interface. At the top, the menu bar includes File, Edit, Source, Refactor, Navigate, Search, Project, and Run. The main editor area displays the file 'Java - CPT\_T1/src/FileTest.java'. Below the editor, the JUnit test runner window is visible, showing 'Finished after 11.473 seconds'. The test results are summarized as 'Runs: 5/5', 'Errors: 0', and 'Failures: 0'. A green progress bar indicates successful completion. The test results list includes:

- FileTest [Runner: JUnit 4] (11.412 s)
  - testOpenDialoguebox (11.350 s)
  - testFile (0.037 s)
  - testExportFile (0.001 s)
  - testOpenFile (0.023 s)
  - testSaveDialoguebox (0.001 s)

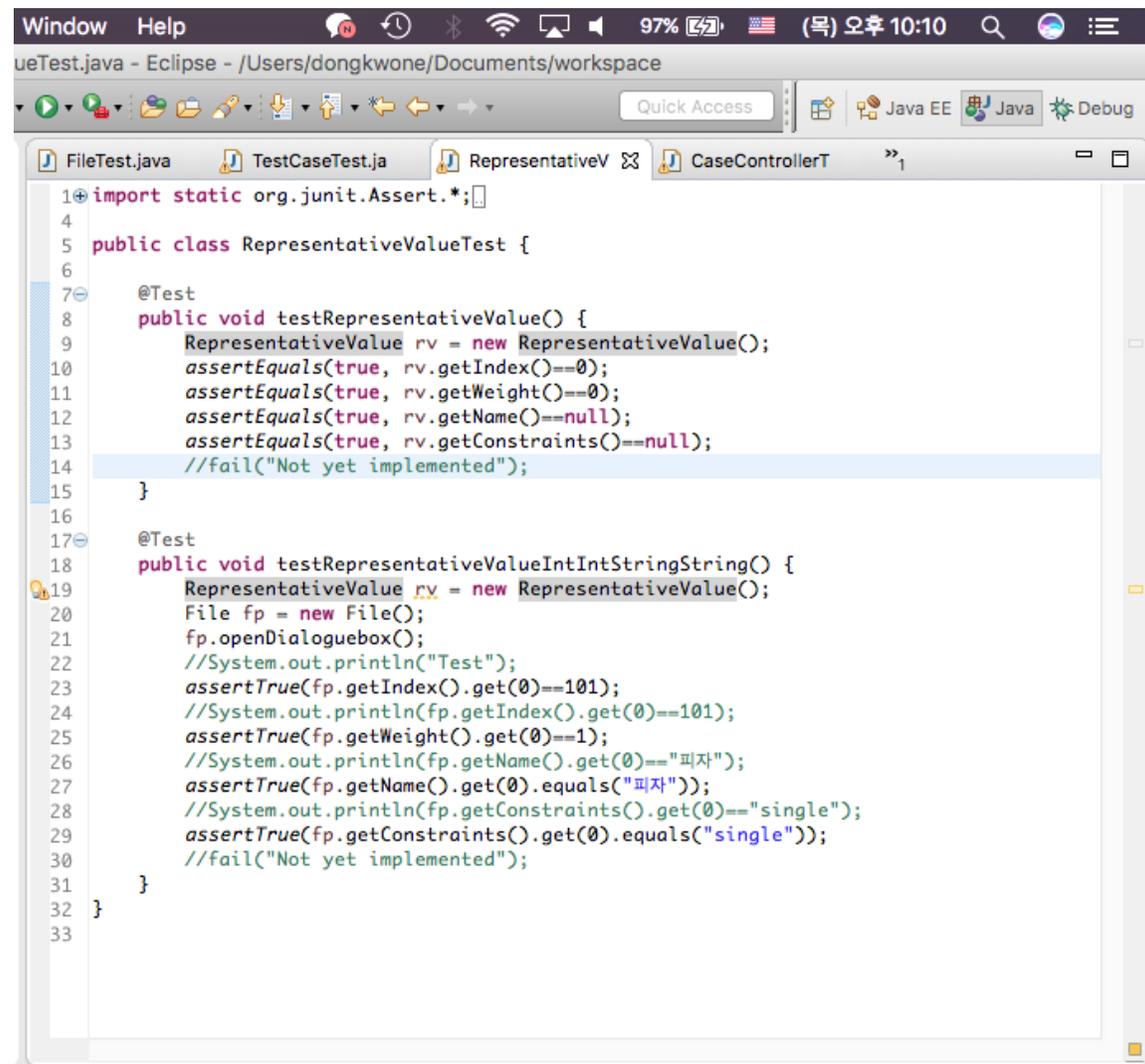

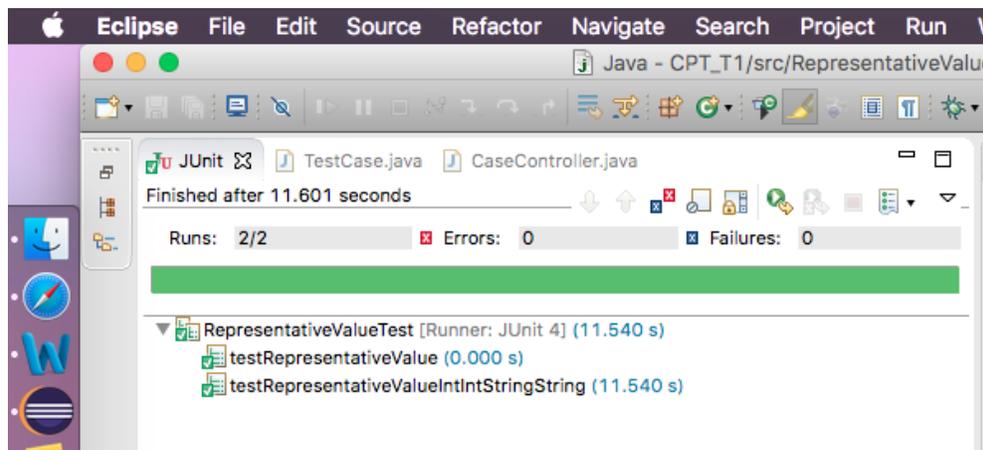

The screenshot shows the Eclipse IDE interface with the source code for 'FileTest.java' open. The code is as follows:

```
6
7 public class FileTest {
8
9     @Test
10    public void testFile() {
11        File fp = new File();
12        assertTrue(fp.getIndex().isEmpty()==true);
13        assertTrue(fp.getWeight().isEmpty()==true);
14        assertTrue(fp.getName().isEmpty()==true);
15        assertTrue(fp.getConstraints().isEmpty()==true);
16    }
17
18    @Test
19    public void testOpenDialoguebox() {
20        File fp = new File();
21        fp.openFile();
22        JFileChooser jfc = new JFileChooser();
23        int yn = fp.jfc.showOpenDialog(jfc);
24        if(yn == JFileChooser.APPROVE_OPTION){
25            String opendir = fp.jfc.getSelectedFile().getAbsolutePath();
26            assertTrue(opendir.contains(".xlsx")==true);
27        }
28        //fail("Not yet implemented");
29    }
30
31    @Test
32    public void testOpenFile() {
33        File fp = new File();
34        assertTrue(fp.getIndex().isEmpty()==true);

GUIManager.java: 244

Navigation

Dead store to fc in Control.GUIManager.openFileChooser()  
Local variable named fc

**Bug:** Dead store to fc in Control.GUIManager.openFileChooser()

This instruction assigns a value to a local variable, but the value is not read or used in any subsequent instruction. Often, this indicates an error, because the value computed is never used.

Note that Sun's javac compiler often generates dead stores for final local variables. Because FindBugs is a bytecode-based tool, there is no easy way to eliminate these false positives.

**Rank:** Of Concern (15), **confidence:** High

**Pattern:** DLS\_DEAD\_LOCAL\_STORE

**Type:** DLS, **Category:** STYLE (Dodgy code)

### XML output:

```
<BugInstance type="DLS_DEAD_LOCAL_STORE" priority="1" rank="15" abbrev="DLS" category="STYLE" first="1">

MainSystem.java: 22

Navigation

Write to static field Control.MainSystem.gm from instance method new Control.MainSystem()  
Field Control.MainSystem.gm

**Bug:** Write to static field Control.MainSystem.gm from instance method new Control.MainSystem()

This instance method writes to a static field. This is tricky to get correct if multiple instances are being manipulated, and generally bad practice.

**Rank:** Of Concern (15), **confidence:** High

**Pattern:** ST\_WRITE\_TO\_STATIC\_FROM\_INSTANCE\_METHOD

**Type:** ST, **Category:** STYLE (Dodgy code)

### XML output:

```
<BugInstance type="ST_WRITE_TO_STATIC_FROM_INSTANCE_METHOD" priority="1" rank="15" abbrev="ST" category="STYLE" first="1">
